DETAILED ACTION

The receipt is acknowledged of applicant's lds, filed 03/21/2002; and drawings, filed 04/15/2002.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a method of relieving symptoms associated with illness comprising transdermal delivery of cannabinoids, classified in class 424, subclass 449.
 - II. Claims 12-22, drawn to an occlusive body, classified in class 424, subclass 449.
 - III. Claims 23-26, drawn to method for increasing the concentration of cannabinoids or their metabolites in a subject, classified in class 424, subclass 449.
 - IV. Claims 27-28, drawn to a method for assessing the permeability of skin to a cannabinoid, classified in class 604, subclass 9.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I, III and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1)

Art Unit: 1615

the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product of Group II does not used to relieve symptoms associated with any particular illness, or to increase the concentration of cannabinoids or to assess the permeability of the skin, and the method of use of cannabinoids of any of Group I, III or IV do not require occlusive body of Group II with the rate-controlling membrane.

3. Inventions I, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions because the method of Group I relieves symptoms associated with illness while the method of Group III does not relieve symptoms but increase a concentration of cannabinoids and the method of Group IV assesses the permeability of the skin.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Isis Ghali whose telephone number is (703) 305-4048. The examiner can normally be reached on Monday through Thursday from 7:00 AM to 5:30 PM, Eastern Time.
